What is Language Learning in Tandem?

"Learning a foreign language in Tandem means that **two people with different native languages** meet on a regular basis. While **supporting each other**, the aim **can be to improve and refresh one's own foreign language competences** and skills and/or to learn more about the target language's culture, the partner's cultural background etc."

Main principles of tandem learning

Autonomy

- each partner is responsible for their own learning
- he/she decides what, when and how
- he/she wants to learn and how the partner should help him/her (e.g. through corrections)

Reciprocity

- Both partners should benefit equally from the tandem partnership
- half of the time is spent learning in one of the two languages
- both partners support each other in their learning

(cf. Brammerts 2001)
